A Collection of Tutorials from Around the Web
Miscellaneous Version

All art within is documented to the original authors and may NOT be used without their permission, plus most of it is being used in their own game, and we will recognize it if you try and pass it off as your own, so do not even try. The work within is to be used mainly as a basis and a stepping stone to create your own art, in your own style. The images may only be used for inspiration and for ideas, but do not copy anyone's artwork. If you have anything to add, email me at scummbuddy@comcast.net

If you have artwork in here and do not want it in here anymore, again, email me at scummbuddy@comcast.net and we'll talk.

Now, let's get to the meat and bones of why we are here; the tutorials and art. I know what you may be thinking, "I'm going to make the best game evaaaa!1" Well, maybe, but first you have got to worry about your art. It's sad, but art sells the game these days, and not the storyline. Within this package, you will find:

Another great one from Aussie. This is just one of many great backgrounds from the game "Chick Chaser". I suggest you play it, if you not only want to see more great backgrounds from Aussie, but have a fun adventure too.

Well, that was fun. Special thanks goes out to Mage, Scotch, Y0ke, Proskrito, Andrew and 2dAdventure for creating these art works for me to gawk at adore. [Edited to add Aussie, Misj, DanClarke and lowresman.] Now with these images in mind, what styles can you come up with. These images above are to be used as tools or stepping stones to get your imagination going, and for you to create your own style. So do not use these in your own work, or try to claim them. These people put a lot of hard work into creating these for us to view, so be kind, and use them only as learning resources.
